

Monferrat Astigiano

## Old spinning mill in Monferrato

Moncalvo

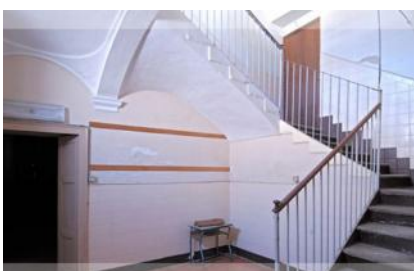

Huge spinning mill dated back XIX century with historic and economic importance, located in a strategic position 15 km. far from the highway access of Asti and Casale Monferrato.

The original part of the building was born for the yarn production and it was subsequently extended in a plot of 17.000 sqm with the realization of a church, offices, mess hall, big open spaces .

All the blocks define a unique complex with different features and historique dating. Thereby the different ages of the buildings generates different conditions of maintenance: some parts needs an heavy rehabilitation while other of them need only a light intervention.

Beautiful example of industrial architecture.
